## Why not just photos? Do I really need an Event Video too?

Quality Special Event Video used to only be available to the rich. Now it's an affordable luxury and a "got to have it" for just about each and every major event! Ask anyone who has had a major event in the last couple of years about Event Video and you will hear one or two things, "I wish I had had one done" or "I'm so glad I did have one done".

You can relive your event, with all the emotion, with a quality Special Event Video. See the anticipation as the groom waits for his bride to appear at the end of the aisle at their wedding. Experience the emotion as your family watches the Student graduate from High School or College. Hear the cheers as you or your close someone receives the award for Sales Person of the Year. Recall precious moments with old friends of your Class Reunion or distant relatives of your Family Reunion.

### SPECIAL EVENT VIDEOS

#### "Why do we need a Special Event Video?"

- A Special Event Video captures and presents the emotions that you felt on that special day.
- A Special Event video allows you to see moments that you normally might have missed and from a different perspective.
- A Special Event Video will preserve your most valuable contemporary memories for a lifetime.
- A Special Event Video is a great way to share your special event experience with friends and loved ones that are unable to attend the event in person.

### How We Do It

Our most popular two-camera project includes all of the key moments of the entire event. Each package includes three copies of the completed production in DVD format. Additional copies are available for \$10.95 each (Qty 1-4).

MPMM camera operators are excellent at working around guests, other photographers, servers and DJs. Most of the time, you won't even notice that we're there.

We solicit our customer's choices of music and respect and recreate their style through music and editing choices for the final production. The final production ranges from 10-120 minutes in length, depending upon the duration, style and captured content of the event.

### Technology

- We use only professional-grade digital photo and video cameras, lighting and sound equipment.
- Our wireless 'clip-on' microphones are non-intrusive yet pick up the voices of Bridal Parties, Keynote Speakers and Entertainers.
- Editing, Authoring and Production is conducted with one of the industry's top Video Production Software systems.

### Package Pricing

Choose from one of our many available packages. Our basic package eliminates the confusion that can surround video production prices. With a fifty-percent deposit, you rest assured that your date is reserved on our calendar schedule. You pay nothing else until two (2) weeks prior to the event, then a final payment when the completed production is ready for delivery. Coverage includes all key elements of your event. Two cameras are used until all key moments are captured.
